

Empress Cushion in Sri Lanka Zircon

Jeffrey Hunt

A light honey-yellow Sri Lanka zircon cut in the original Empress Cushion design. The girdle wraps continuously around the stone rather than separating crown and pavilion in the traditional manner, giving the form some of the sculptural character of a briolette. Broad planes of pale gold, honey and deeper amber fold through the interior, creating a shifting pattern of reflected light as the stone turns.

Sri Lanka Zircon, 8.25 carats.
